Story

Date	26 August 2026
Team ID	Individual
Project Name	India's Agricultural Crop Production Analysis
Maximum Marks	5 Marks

A Tableau **data story** was created to present the agricultural analysis in a clear and logical sequence. It helps users understand India's crop production from **1997 to 2021** through different story points and visualizations.

The story covers **overall production, geographic distribution, state-wise production, cultivated area, crop-wise and season-wise analysis, and year-wise production trends**.

Observations

- Agricultural production varies significantly across different states.
- Karnataka is a major contributor to total production in the analysis.
- Uttar Pradesh has the highest cultivated area among the major states analyzed.
- Rice and wheat occupy significant cultivated areas in northern India.
- Cotton and soyabean are prominent crops in central and western India.
- Production changes over time and can be analyzed using the year-wise trend.
